Performance

The brain and brawn to tackle the toughest tasks

Powerful Kubota engine

Tapping Kubota's legendary heritage of formidable engine designs, the GR2120 is equipped with a 21-horsepower, 3-cylinder diesel power plant. It generates a high torque rise that easily handles hours of heavy-duty mowing, even in long, wet grass, with a grass collector mounted.

clutch are incredibly durable

and worry-free.

Specifications

Specifications				
Model		GR2120	GR2120S	
Engine				
Model		Kubota D782-E3-GX		
Type		3 cylinder, diesel, water-cooled		
Total displacement	cc	77	778	
Gross horsepower according to SAE	kW (PS)	15.6 (21.0)		
Engine layout		Horizontal		
Fuel tank capacity	1	18		
Dimension				
Overall length	mm	28	2880	
Overall width	mm	12	1280	
Overall height	mm	12	1230	
Wheelbase	mm	12	1280	
Tread				
Front/Rear	mm	825/	800	
Weight (w/mower and grass collector)	kg	515	445	
Tyre size				
Front/Rear		16×7.5–8/23×10.50–12		
Transmission		Hydrostatic transmission		
Transmission drive		Shaft drive		
Speed control		Single foot pedal		
Front-wheel drive		Glide Steer		
Travelling speed				
Forward/Reverse	km/h	0–10.0/0–5.0		
Brake		Internal expanding brake		
PTO clutch		Hydraulic wet multi discs		
Mower deck drive		U-joint shaft		
Steering system		Glide Steer, fully hydraulic power steering		
Operator's deck		Flat		
Seat adjustment		Slide		
Seat suspension		Parallel linkage		
Fuel gauge		Std.		
Hour meter		Std.		
Easy checker		Std.		
Mower OPC.		Std.		
Travel OPC.		Std.		
Blade shut off brake		Built-in clutch		
Mower shut off when collector open		Std.	-	
Grass collector			-	
Capacity	1	450	-	
Dumping system		Manual	-	
Material of bag		Fabric/Steel	-	
Optional accessories & implements				

Mower Specifications

Cutting width	inch. (m)	48 (1.22)		
Mower system		Direct chute	Side discharge	
Mower blade drive		V./hexagonal belt	V belt	
Lifting device		Hydraulic		
Mower mounting method		Quick attach		
Cutting height	mm	25–102		
Cutting height adjustment		Dial		
Cutting height position		11		
Number of blades		3		
Direction of rotation		2 clockwise viewed from operator, 1 counter clockwise	clockwise viewed from operator	
Minimum uncut diameter	m	1.0		
Mower deck ground clearance	mm	135	140

KUBOTA DIESEL RIDE-ON MOWER

Comfort, functionality and design-the GR2120 is exactly the right

At the end are the results.

This high-end ride-on boasts our unique Glide Steer, an innovative Direct Chute System, a 21-horsepower engine and a newly designed grass collector.

Test drive the GR2120 today and experience unmatched performance in both efficiency and final finish.

Fatigue-reducing power steering

Feather-touch power steering enhances manoeuvrability, reduces fatigue, and makes operating the GR2120 possible for virtually anyone.

Versatile HST transmission

Kubota's reputable and versatile HST transmission is easily controlled by a single foot pedal and produces a maximum travel speed of 10km/h.

Suspension seat/full-flat deck

Oversized and generously padded, the GR2120's parallel linkage suspension seat can be adjusted to provide a high level of comfort to a wide range of operators. Its full-flat deck minimises operator fatigue by offering plenty of legroom.

Perfect cut

Our Direct Chute System and new side-discharge mower ensure professional results.

The GR2120's Direct Chute System efficiently cuts and channels grass straight back into an integrated rear grass collector. The deck's cutting width is an ample 48 inches, and thanks to its centre-discharge configuration, you can execute tight, tree-hugging turns in either direction. For those who prefer a side-discharge mower, the GR2120S's mower deck is constructed of durable 10-gauge steel and is designed with a 127 mm deep shell. Whichever system you choose, you'll be assured professional and lasting results.

Maximum comfort

The sophisticated grass collector design makes catching and dumping grass easy.

The grass collector on the GR2120 maintains a large capacity, yet, is lighter, easier to empty and utilises innovative mower technologies to prevent clogging.

The 450-litre grass collector has been made lower and longer to minimise clogging and reduce time between dumping. The collector also boasts lighter materials for easier handling.

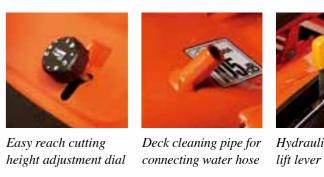

Easy emptying

A gas-spring assist mechanism on the collector lever used for dumping makes lifting, even a full basket, easy. The lid of the collector opens wide, making maintenance easy work.

Well-designed duct

A handy electronic sensor is added to signal when the collector needs to be emptied. The wide duct leading from the mower deck is designed to move grass smoothly. A lever on the side of the tractor allows the operator to expel excess grass from the duct without leaving the tractor

Deck cleaning pipe for Hydraulic mower

hexagonal belt

Rear Deflector

An optional rear deflector is available for times when you choose not to use the grass collector. This deflector discharges grass and dust directly onto the ground and easily attaches to the end of the duct, which leads from the mower deck.
